Key Features of RIMS

Very short lineVery short lineVery short lineVery short lineVery short lineVery short line

Centralized Research Repository

All research outputs and academic contributioAll research outputs and academic contributions are documented, verified, and stored in one digital environment.

Streamlined Submission & Approval Workflow

Faculty and scholars can seamlessly submit entries while administrators review, validate, and approve data, enabling efficient research documentation and reducing manual administrative workload.

Data Insights & Institutional Visibility

Aggregated research data supports decision-making, accreditation processes, and strategic planning, while enhancing the University's visibility across national.

CATEGORY CARDS

I will provide a standardized short description for each card so your design looks consistent. Feel free to adjust length based on card size.

IPR (Patents & Copyrights):

Documents intellectual property generated by SPSU researchers, including patents, copyrights, and innovation disclosures.

Journal Publications:

Maintains peer-reviewed journal research contributions published by faculty, scholars, and researchers.

Conference Publications:

Stores papers presented in national and international academic conferences.
